This section is *optional* and can be used to provide a summary of recommendations to the IT manager regarding which controls and/or compliance best practices Botium Toys needs to implement, based on the risk posed if not implemented in a timely manner.

Recommendations (optional): In this section, provide recommendations, related to controls and/or compliance needs, that your IT manager could communicate to stakeholders to reduce risks to assets and improve Botium Toys' security posture.

Recommendations to Shareholders of Botium Toys by Richard Alexander Adams:

As a result of the audit checklist there are some very important controls that need to be in place to minimize threats to the assets of the company. Many preventive controls are missing that would help prevent incidents happening in the first place such as least privileges, access control policies, account management policies and separation of duties. On the technical side the company is lacking crucial controls such as intrusion detection/prevention systems, encryption, and backups. The main compliance issue is that the PII/SPII of the customers is not confidential due to everyone in the company having access to all customer credit card information which we must have only authorized users with those permissions in order to reduce risk of internal threats.
